Report No. 81-3-5

Issued: 5/12/81

## AERIAL DETECTION SURVEY OF FOREST INSECT AND DISEASE ACTIVITY, DANIEL BOONE NATIONAL FOREST, KENTUCKY

LAND OWNERSHIP OR SURVEY AREA: Daniel Boone National Forest

STATE: Kentucky

AREA WITHIN SURVEY BOUNDARY: Stearns, Somerset, and London Ranger Districts  
616,859 acres

DATE: May 4-5, 1981

PERCENT COVERAGE: 50%

AIRCRAFT: Cessna 182

CREW: William Carothers, Tom Buckner

REPORT PREPARED BY: William Carothers

### SURVEY OBJECTIVES

To detect and accurately plot all insect and disease activity within the boundaries of the survey area.

### SURVEY RESULTS

No unusual insect or disease activity was observed.

### CONCLUSION

At the current time insect and disease activity is at a low level on the southern portion of the Daniel Boone National Forest. Field surveillance by the National Forest personnel should continue to promote early detection of potential insect and disease problems.
